

RigSleeve

What is RigSleeve?

RigSleeve is a sleeve for parachute rigs. It provides protection for your rig especially while travelling. Unlike a gear bag, RigSleeve is light weight, sleek, and slim. In addition it also diguises your rig so it looks like a regular backpack, creating "flying friendly enviroment".

Features

Packing Mat

Just like a regular packing mat, RigSleeve is equipped with middle and side ties for any packing style. We recommend not dragging RigSleeve while packing.

Handle Sleeves™

RigSleeve features “Handle Sleeves™” that will protect both of the emergency handles. The Handle Sleeves reduce the chance of both handles being accidentally pulled. The Handle Sleeves cover around the emergency handles and are also attached to the RigSleeve.

Adjustable Snaps

With adjustable snaps, RigSleeve is designed to hug the rig, creating slim and sleek looks.

Water Resistant

Made with water resistant “Nylon Taslan” fabric, that could save the rig from minor water damage. Warning: Water can still go inside the RigSleeve from the openings, so please don't leave your rig in the rain!

3 Pockets

For pull up cords or extra rubber bands. RigSleeve has 3 pockets; small side covered pocket, big front covered pocket and elastic mesh pocket for water bottle or energy drink. Basically It functions as a mini gear bag.

Elastic Bottom

For the legs straps! The elastic bottom will make sure the leg straps fit nicely inside the RigSleeve.

Carabiner Clip

Comes with carabiner clip that can be used to hang other equipment like helmet.
